PROFILE

Enthusiastic MERN stack developer with a strong track record of completing complex web projects that highlight problem-solving skills and technical expertise. Quick learner, team player, and innovative thinker, eager to contribute to a dynamic development team.

PROJECTS

1) kidzone (e-commerce application)

An online e-commerce MERN application for kids' clothing and accessories. It includes both user and admin sections, and it features a clean and intuitive design. Kids and parents can easily shop for trendy fashion items, while administrators can efficiently manage products and orders.

api doc　　　: **https://kidzoneapi.vercel.app/**

live project　: **https://kidzone.vercel.app/**

git hub repo　: **https://github.com/ASWIN-
PALAYAD/kidzone.git**

Features :

- Register & Login.
- Admin dashboard with sales report
- payment integrated(stripe)
- coupon management
- sorting and filter
- CRUD operation for admin

2) fiverr clone(on going)

Developing a Fiverr-inspired application using the MERN stack, complete with a real-time chat feature. This platform allows freelancers to offer their services, while clients can find and hire the right talent. The integrated chat functionality enables seamless communication between freelancers and clients, facilitating collaboration and project management.

git hub repo　: **https://github.com/ASWIN-PALAYAD/
mern_freelance_job_app.git**

Features :

- Register & Login
- Add projects
- Real time chat
- CRUD operation on gigs
